Electrode Holder

Electrode Holders; These are fully insulated electrode holders which conform to ISI Standards (IS-2641). Its handle, lever, spatter protection guards are made of fire retardant and heat resistant imported material. Special quality of copper alloy as main conductor & brass jaws ensure good contact with electrode and continuous duty cycle. This holder is very light weight and suitable for cables up to Al120/Cu70 sq.mm.

A. Holder HC-600: This electrode holder is Type 'B', semi insulated, heavy duty for use in project sites and workshops. Spatter protection guard of this holder is moulded from FR grade plastic. Its handle and lever is made of 'Paper Hylum' which ensures good heat resistant quality and ensures minimum welder's fatigue due to its light weight. This holder conform to IS: 2641.

Specifications	
Description	Electrode Holders HC-600
Size	26 x 10 x 10 inch
Material	Plastic/ Metal
Specification	Ideal For 600Amps Welding Machine
Colour	Black
Standards	IS-2641

B. Holder King Sword-600: This is B-type electrode holder with fully insulated head to resist spatter. Sturdy handle made of fibreglass polyamide is light weight and for heavy duty application. Insulation resistant above 1 mega ohm and dielectric strength up to 3000 volts ensures enhanced safety. This holder is suitable for cables up to Al120/Cu70 sq.mm. and CE certified as per European standard EN60974-11.

Specifications	
Description	Electrode Holder King Sword-600
Material	Plastic/ Metal
Specification	Ideal For 600Amps Welding Machine
Strength	Insulation resistant above 1 mega ohm and dielectric strength up to 3000 volts.
Weight	650 Grms.
Colour	Black & Red
Standards	CE certified as per European standard EN60974-11.

B. Holder King Cool-600; Crocodile style type 'B' fully insulated electrode holder, conform to IS-2641. Its handle, lever, spatter protection guards are made of fire retardant and heat resistant imported material. Special quality of copper alloy as main conductor & brass jaws ensure good contact with electrode and continuous duty cycle. This holder is very light weight and suitable for cables up to Al120/Cu70 sq.mm.

Specifications	
Description	Electrode Holder King Cool-600
Material	Plastic/ Brass
Specification	Ideal For 600Amps Welding Machine
Strength	Insulation resistant above 1 mega ohm and dielectric strength up to 3000 volts.
Weight	800 Grms.
Colour	Black
Standards	CE certified as per European standard EN60974-11.

Features:

- This is crocodile style type 'B' electrode holder, which is made from black phenolic resin insulated jaws and black DMC handle
- This holder is fully insulated for extra safety and brass jaws ensures good contact
- It is suitable for Cable up to Al 120 sq. mm. / Cu 70 sq. mm
- Used in heavy duty welding application
- Weight: 0.8000 Kg.
