Safety Coverall

TM

Safety Coverall; Protective coveralls were created to ensure a high level of protection during work activities. They cover or replace personal clothing and their main purpose is to protect the worker from chemical, biological, mechanical, thermal, electromagnetic and electrical hazards. Coveralls are a type of safety clothing made of tough cotton, denim, polyester and fire retardant fabrics or linen and usually used as protective clothing while working. It is a loose fitting pair of pants with supporting cross-straps, or a full or half sleeve shirt that is worn over regular shirts, vests and trousers. There are three types of Safety Coverall available such as;

A. Cotton Safety Coverall: These Coverall Suits are made up from cotton and consists of reflective tapes which provide lower and upper body protection to the employees while performing work. These Coverall Suits are Reflective, Waterproof, Breathable, Disposable and have high tear strength.
